Urine Drug Screening Testing Policy

Dear Patient,

As you are probably aware, some of the medications we prescribe are "controlled substances" (ex. Oxycodone, Morphine, Hydrocodone, etc.). While regulatory agencies, such as the DEA, The Board of Medical Licensure, and the police require us to monitor our patients who take these medications, most importantly we do it to promote your safety. Therefore, to help provide you with safe and responsible healthcare we will randomly require you to participate in urine drug testing three to four times a year.

Please keep in mind that this may not be the only time you could be required to have a Urine Drug Screen. We consider urine drug testing to be a normal monitoring procedure for anyone taking controlled substances. We monitor controlled substances just like your primary care physician monitors your cholesterol, blood sugar levels and blood pressure.

The billing policy for Urine Drug Screens is as follows:

- **Patients whose insurance excludes** Urine Drug Screens will be charged a cash price per test. This fee is expected to be paid at the time of service.
- **Patients with insurance** will be billed the amount put to their deductible/coinsurance by their insurance.

We appreciate your cooperation. We are all in this together. If you have any questions, please contact our office.

RECORDING OFFICE VISITS
-PRACTICE POLICY-

With the proliferation of smart phones, tablets, micro recorders, and other video and audio recording devices which capture and store video and audio files (collectively, "Recorders"), we wanted to make you aware of our office policy on the use of these Recorders within our practice and during your visit with a provider, either in person or via telehealth (our "Recording Policy"). Please ask the provider or any staff member if you ever have any questions about our Recording Policy.

Please understand that the genesis of our Recording Policy is to protect your personal health information, and that of other patients, from being accessed by non-authorized parties. As a medical provider, we are subject to certain state and federal privacy laws, including the Health Insurance Portability and Accountability Act of 1996 (HIPAA), which require us to take reasonable measures to prevent the unauthorized access of our patients' protected health information (PHI). Recorders used during an office visit may result in the unauthorized recording of another patient's PHI, intentionally or inadvertently, or you may misplace or lose your Recorder once you leave the office, providing others with access to your PHI and potentially subjecting us to fines and penalties. Center for Spine and Pain Medicine will not be responsible for and cannot be held liable for lost Recorders or recordings.

Therefore, we have developed the following Recording Policy, and we ask that you carefully read and sign where indicated to signify your (i) understanding of the Recording Policy, and (ii) agreement to adhere to same.

1. **While in the office lobby, administration areas, receptionist area, billing office, hallways, and other common areas (collectively, the "Common Areas"):**

   The use of all Recorders is **strictly prohibited** in the Common Areas unless (1) the Recorder is needed for communication purposes in accordance with the Americans with Disabilities Act (ADA) or other state/federal access to healthcare laws (collectively, "Access Laws"), OR (2) the Recorder is needed to help the patient remember what a staff member told him/her about billing questions, follow up instructions, future appointments, etc. If the latter, we ask that the patient first ask the staff member for permission to record the interaction. Under no circumstances, however, is a patient permitted to video record in the Common Areas unless authorized by Access Laws.

2. **While in a patient room communicating with a provider (the "Patient Room"):**

   The use of all Recorders is **strictly prohibited** in the Patient Room unless (1) the Recorder is needed for communication purposes in accordance with Access Laws, OR (2) the Recorder is needed to help the patient remember what the provider told him/her at the time of the visit. If the latter, we ask that the patient first ask the provider for permission to record the interaction. Under no circumstances, however, is a patient permitted to video record a provider visit unless authorized by Access Laws.

3. **While on a telehealth visit (the "Telemedicine Exam"):**
